

# HEALTH

**Part of the “Public Services” Section of the Citizen Report Card  
on Public Services, Good Governance and Development from 120 Niger Delta Communities**

**(6 States, 13 LGAs, 478 Focus Groups, 9,018 Participants)**

Niger Delta Professionals for Development (NIDPRODEV)  
Effurun-Warri, Delta State, Nigeria  
January 2011

Sponsored by the European Union

This project was funded by the **European Union (EU)**. Based on a partnership agreement between the **EU** and the **Federal Republic of Nigeria**, the implementation responsibilities of the **EU INSIDE** programme belong to the **National Planning Commission (NPC)**.

**Niger Delta Professionals for Development (NIDPRODEV)** is a Nigerian non-governmental organization that has worked in the Niger Delta for over 11 years on conflict management, community development, good governance, livelihood issues, and data collection and analysis. The **Leadership Center for Peace, Integrity and Transformation** is NIDPRODEV's parent organization.

### **NIDPRODEV**

PTI Road, Plot 211, Fashion-N-Vogue Building  
Effurun-Warri, Delta State  
234 802-327-0549, 234 805-851-1591

## METHODOLOGY

1. NIDPRODEV programme officers fluent in local languages and culture visited each of the 120 communities, where they first spoke to community members in a Town Hall Meeting to describe the project and answer any questions. Community members were then asked to participate in Focus Group discussions. Those who participated were divided into four (4) different focus groups based on gender and age: Older Men, Younger Men, Older Women, and Younger Women. The age of forty years (40) was given as the distinguishing age between an older person and a younger person. Although NIDPRODEV staff did not verify participants' ages, it did ensure that people who presented themselves in focus groups who were noticeably above or below the appropriate age for that group were asked to join the appropriate Focus Group.
2. Within each Focus Group, participants were asked each survey question and then instructed to discuss the question openly among the group members. When the group reached consensus on an answer, the NIDPRODEV programme officer repeated the answer and asked the group to confirm that the answer given is indeed the one they wished to have recorded. For certain questions that required individual participant answers, such as "Who in this room can read a book out loud to another person," participants were asked to raise their hands as the form of response.
3. In addition to specific answers to survey questions, qualitative responses from each Focus Group were recorded by the NIDPRODEV programme officers. Those narrative answers are provided in whole in the section of the Citizen Report Card of 120 Niger Delta Communities as "Community Member Comments." The comments reinforce the answers given in the survey responses, and in some cases, go further in providing a more contextual understanding of community life and struggles.
4. The responses of women in the Younger Women Focus Groups are used herein for all questions that relate to (a) immunization of children, (b) the distribution of free mosquito nets, and (c) treatment of children for malaria and diarrhoea. This decision was made because of the Younger Women's greater awareness of what is being provided for young children in the community, and because their efforts to treat or seek treatment of young children today may differ from Older Women's efforts or past behavior.
5. All questions were open-ended. NIDPRODEV programme officers did not suggest any possible answers to the focus group members.

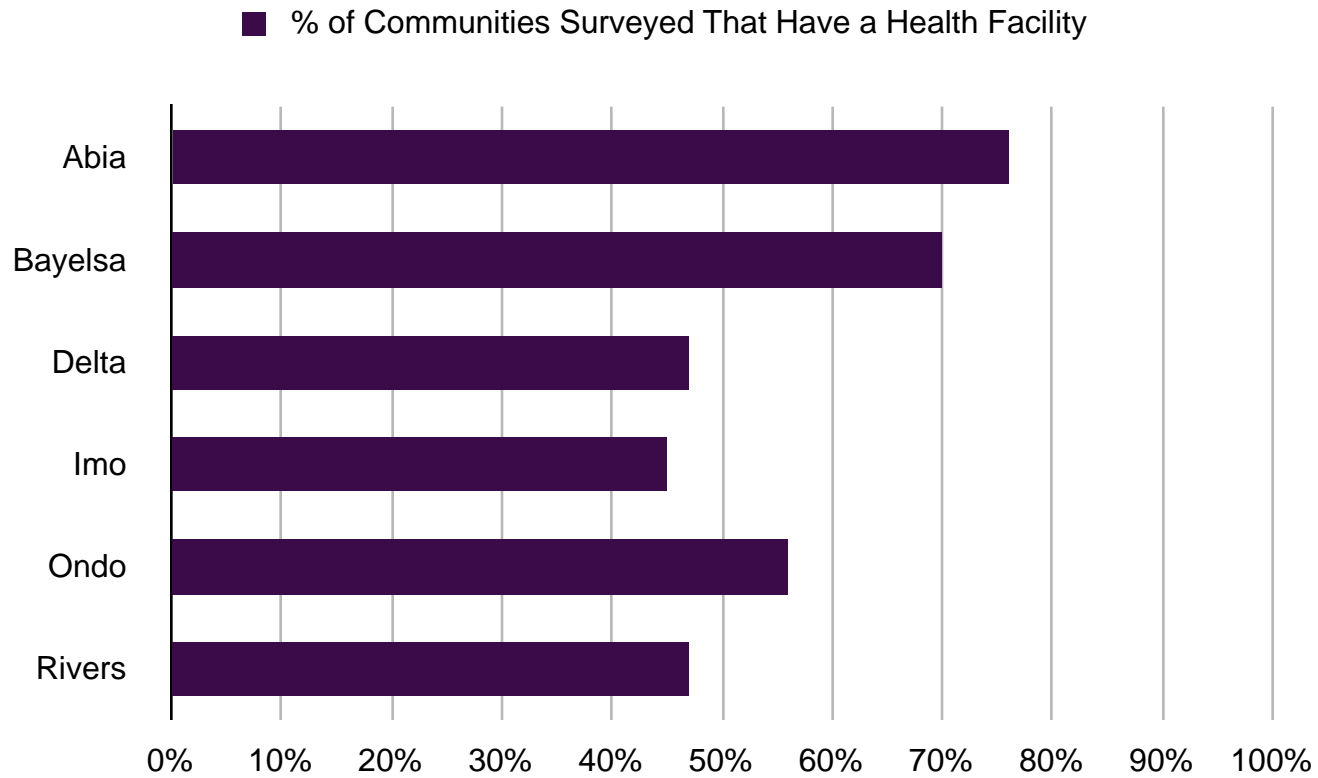

## TABLE OF CONTENTS

Page

1. Summary of Surveyed Communities that have some form of health facility .....	5
2. Summary of Functionality of Community Health Facilities, based on:	
Drug Availability and Medical Equipment .....	6
Medical Personnel (Doctors and Nurses) .....	7
3. Summary of Immunization of Children .....	8
4. Summary of Free Mosquito Net Distribution .....	9
5. Summary of Mosquito Net Usage .....	10
6. Summary of HIV/AIDS Awareness .....	11
7. Community-Level Health Information Details by State, Local Government Area, and Communities:	
Abia State .....	13
Bayelsa State .....	25
Delta State .....	39
Imo State .....	55
Ondo State .....	68
Rivers State .....	81

## COMMUNITIES WITH SOME FORM OF HEALTH FACILITY

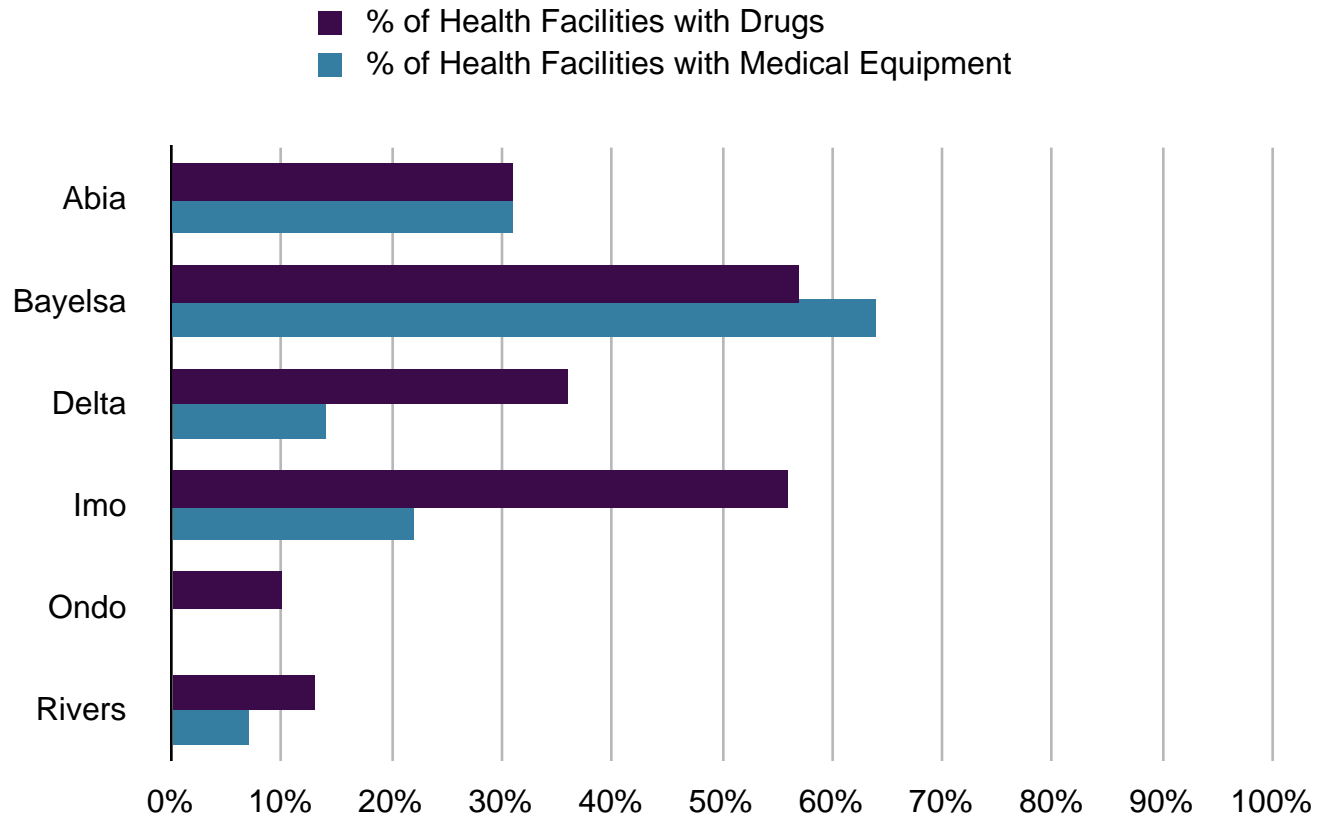

(a State-to-State comparison)

# FUNCTIONALITY OF COMMUNITY HEALTH FACILITIES

## Drugs and Medical Equipment

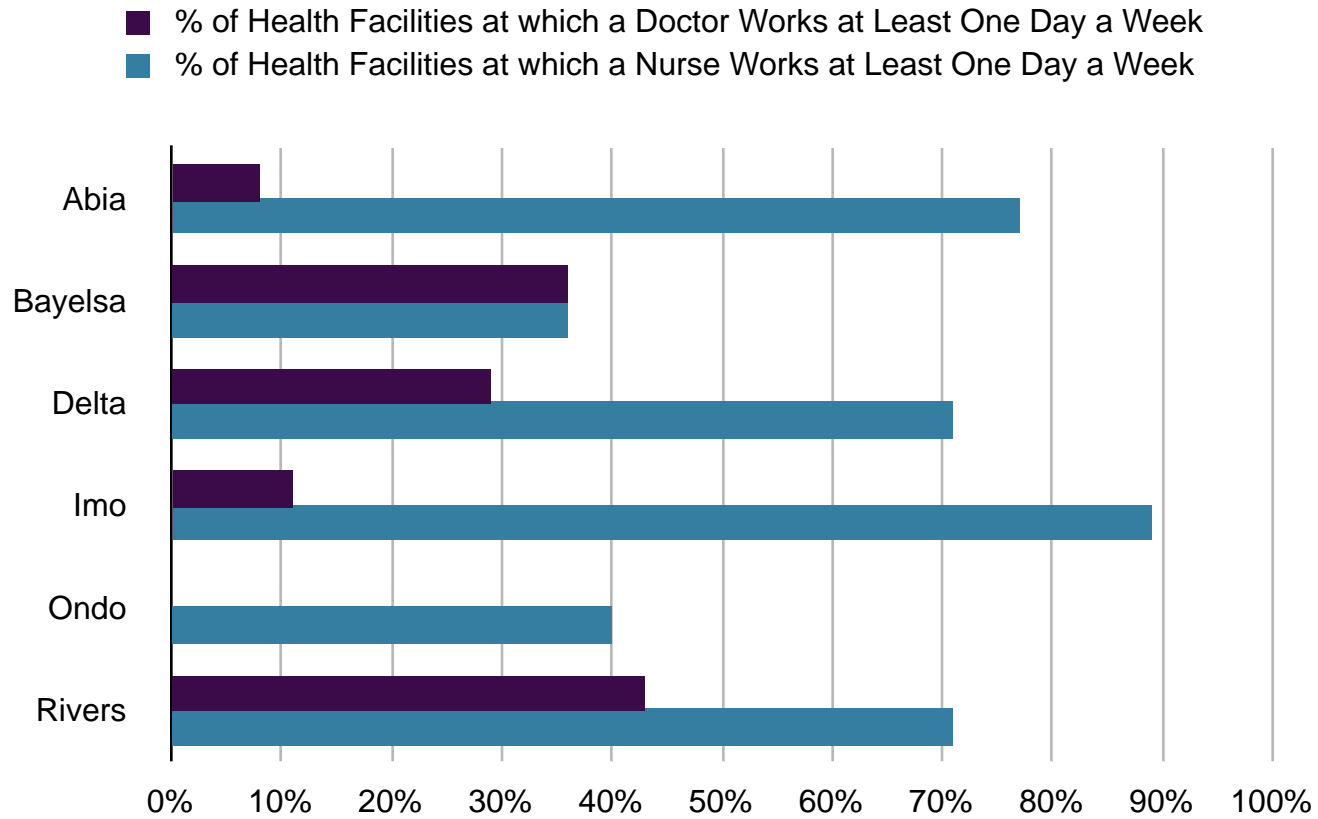

(a State-to-State comparison)

# FUNCTIONALITY OF COMMUNITY HEALTH FACILITIES

## Medical Personnel

(a State-to-State comparison)

# IMMUNIZATION OF CHILDREN

(a State-to-State comparison)

■ % of Communities Surveyed That State Their Children Received Immunizations Over the Past Year

## FREE MOSQUITO NET DISTRIBUTION

(a State-to-State comparison)

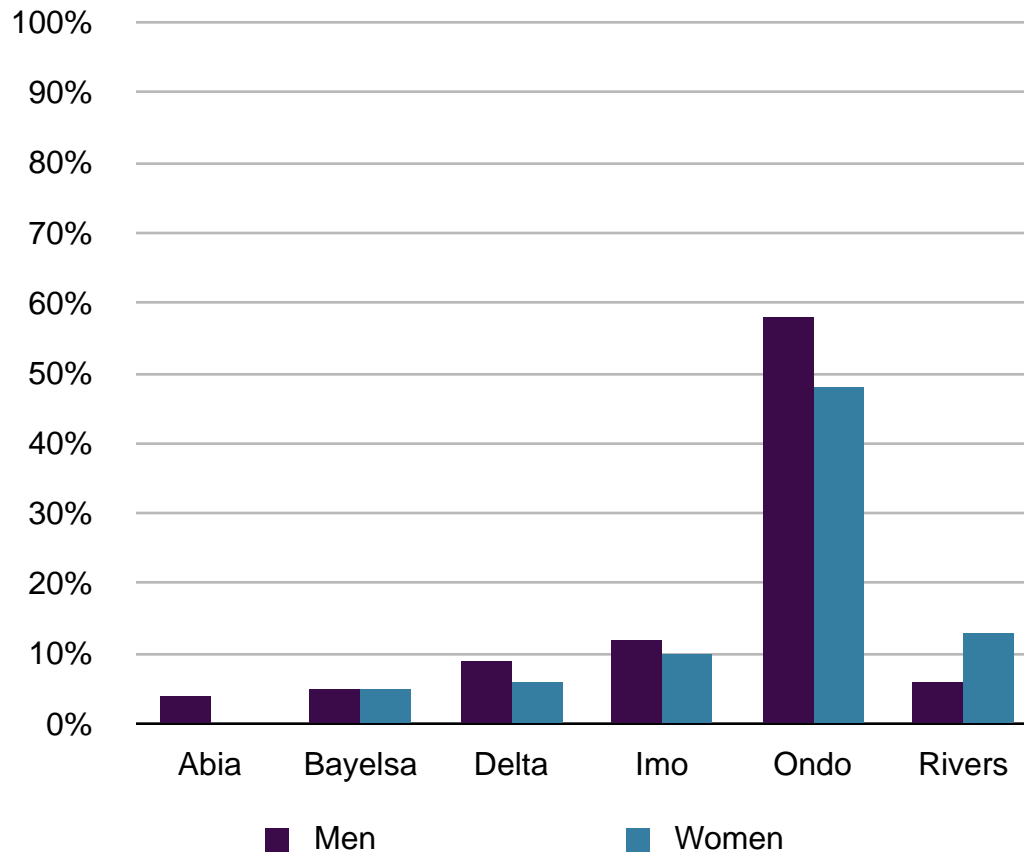

■ % of Communities Surveyed That State That Free Mosquito Nets Were Distributed Over the Past Year

## MOSQUITO NET USAGE

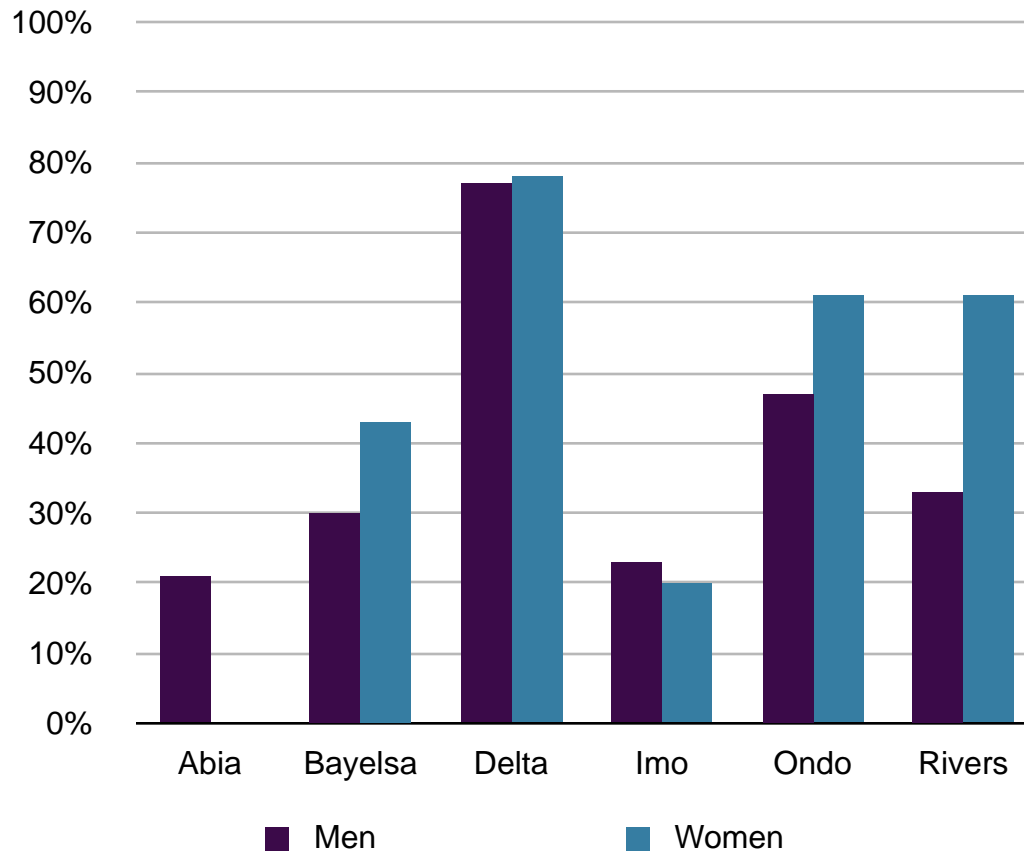

PERCENTAGE OF PARTICIPANTS WHO SAY THEY SLEPT UNDER A MOSQUITO NET THE NIGHT BEFORE

(State-to-State Comparison)

**HIV/AIDS AWARENESS: Percentage of Focus Groups That State That They Do Not Know the Causes of HIV/AIDS or Have Glaring Misperceptions About the Causes of HIV/AIDS\***

**(State-to-State Comparison)**

\* “Glaring misperceptions” include mosquitos, dogs, dirty water, dirty toilets, foreign travel, long-term hunger and deep kissing. See tables within each State section for specific Focus Group responses.
